ANGGA ADY ERMAWAN

Senior Product Designer — Product UX · Design Systems · AI-Assisted Design

Yogyakarta, Indonesia (GMT+7) · **aaegraphic@gmail.com** · **+62 858 6891 7733** LINKEDIN

Open to remote Works across UK, Europe, Middle East & APAC hours (**GMT+0 to GMT+11**) AAEGRAPHIC.COM

PROFILE

Senior Product Designer with 10+ years in SaaS, ERP, and e-commerce most recently designing an e-commerce funnel and checkout platform (Funnelish) and founding EDVORA, a SaaS I took from idea to launch-ready. I turn complex workflows into clear products, build design systems with Figma tokens and code-ready components, and design AI features people can trust. I mentor junior designers, work closely with engineers, and have 3+ years of remote experience with UK and Germany based teams.

SELECTED IMPACT

- **0 → 1 product** — Founded **EDVORA** and took it from spec and prototype to a launch-ready multi-tenant SaaS (5 phases, 319 automated tests), including market research and pricing.
- **AI product design** — Designed **Funnelish AI**: instead of the team producing ~100 templates over 6 months, users now generate funnels on demand from their own settings. At top.legal, improved the AI contract assistant to flag risky clauses in context.
- **Design systems** — Built a centralized design system with Figma tokens and copy-ready code at SEVIMA (+30% production quality), and another at Funnelish, mentoring junior designers to apply it.
- **Growth & conversion** — Redesigned Funnelish's funnel store and templates during a period when users grew 3.5x (845 → 3,000+); redesigned Talentvis's website, +40% Gen Z sign-ups.

CORE STRENGTHS

- **Product UX**: Complex user flows · Information architecture · Interaction models · Data-rich dashboards · E-commerce & checkout
- **Design Systems**: Design tokens · Reusable components · Patterns & states · Documentation · Engineering handoff
- **AI & Delivery**: AI product features · AI-assisted exploration · Rapid prototyping · Responsive & localized UI

EXPERIENCE

EDVORA
Indonesia

Operations platform for Indonesian training centers (LPK) sending participants to Japan

2026 – Present
Founder & Product Designer · **Own product**

- Took EDVORA from idea to a launch-ready multi-tenant SaaS: wrote the technical specification and interactive prototype, then led delivery across five development phases (Next.js, React, Prisma, MySQL; 319 automated tests passing).
- Designed the product around the student journey - registration, learning, exams, documents, placement, departure — with departure-document tracking and reminders as the core feature, plus multi-branch monitoring and subscription billing (VA/QRIS).
- Mapped and scored 591 official sending organizations to define the first target segment, set four pricing tiers, and built the sales pipeline, outreach messaging, and video scripts; now in early customer outreach.

Funnelish — UK-based e-commerce funnel & checkout platform
London
Jun 2024 – Oct 2026
Senior Product Designer
Remote · Full-time

- Designed **Funnelish AI** and led research into AI-assisted funnel building, replacing a ~100-template, 6-month production cycle with funnels users **generate on demand** from their own settings.
- Redesigned the funnel store and template system so users could create template variations far more easily, during a period when the user base grew from **845 to 3,000+ (3.5x).**
- Initiated Figma design tokens and standardized patterns, button hierarchy, component states, tables, badges and **mentored junior designers** to apply them, keeping dashboard, storefront, and template surfaces consistent.
- Designed complex product workflows: funnel builder stages and steps (structure, ordering, collapse), image upload and optimization (settings, live preview, processing states), and archive/restore lifecycle actions.
- Designed conversion-focused funnels, landing pages, and reusable web templates; contributed to SEO/GEO readiness and worked with engineering on specs, shared libraries, and handoff.

top.legal — Germany-based legal-tech platform
Germany
Mar 2024 – Jul 2024
Senior Product Designer
Remote · Contract

- Designed improvements to the **AI contract assistant** so it flags clauses that are non-compliant or one-sided against a party directly inside the agreement.
- Reworked layouts and typography to handle long German-language strings, fixing truncation and overflow so the localized product stayed readable and usable across screens.
- Delivered scalable, accessible, responsive UI with international engineering and stakeholder teams, from concept to build.

SEVIMA — Indonesian academic ERP platform for higher-education institutions
Indonesia
Jul 2023 – May 2024
Senior Product Designer
On site · Full-time

- Proposed and built a **centralized design system library** ,Figma design tokens and components, that developers referenced for every UI update, keeping all modules visually consistent and improving production quality by 30%.
- Provided copy-ready code snippets alongside components and worked with UI engineers to get the system implemented in code, speeding up delivery of new features.
- Led UX for academic ERP platforms; ran user research and turned findings into mobile and web prototypes.
- Designed a university leadership dashboard for monitoring academic and operational performance.

Talentvis — Singapore-based recruitment & HR company
Singapore
Oct 2018 – Jul 2023
Senior UI/UX Designer
Remote · Full-time

- Redesigned the dated company website with a modern visual style aimed at younger talent, increasing Gen Z sign-ups by 40%.
- Designed a central talent-management dashboard unifying the company's divisions, nurse recruitment, cabin crew, Talentvis Academy, and the main Talentvis platform, so talent could be managed in one place.
- Designed ERP dashboards and internal applications over nearly five years, analyzing user behavior to refine flows and supporting front-end teams with documented design assets.

SKYSHI Digital
Indonesia

Indonesian digital product studio

Oct 2016 – Oct 2018
UI/UX Designer
On site · Full-time

- Designed the early version of ruparupa.com, Kawan Lama Group's e-commerce platform for home and living retailers such as Informa and AZKO (formerly ACE Hardware Indonesia), helping take physical stores online.
- Designed both the customer-facing shopping platform and the purchasing dashboard behind it.

PT Gamatechno Indonesia

Indonesian software company behind the eCampuz higher-education platform

Jun 2015 – Oct 2016
Graphic Designer
On site · Full-time

- Created conceptual promotional videos for eCampuz, Gamatechno's academic information system, helping universities understand the value of an integrated campus information system.

TOOLS & METHODS

Figma · Design Tokens (Figma Variables) · Design Systems · Prototyping · Wireframing · Information Architecture · User Research · User Behavior Analysis · Responsive Design
Localization-ready UI · E-commerce & Checkout UX · Design Handoff · AI-assisted Design Workflows

EDUCATION

Indonesian Institute of the Arts (ISI Yogyakarta)
Bachelor's Degree, Visual Communication Design
2010 – 2015
